SUMMARY

Hello, I'm a full-stack web developer with a passion for making things and figuring out how they work. Recently graduating from Dev Academy, I bring a decade of valuable retail experience from my previous career, showcasing my ability to excel in team environments and consistently meeting deadlines. Drawing on this background, I've cultivated a knack for keeping a level head under pressure and always being ready to assist where needed. This year, I seized the opportunity to transition into the tech sector. As I embark on this new journey, I'm thrilled to work alongside those who connect with my mindset and objectives.

EXPERIENCE

Dev Academy Aotearoa

Aug 2023 - Dec 2023

Apprentice software Development Bootcamp

- This was a life changing 15-week 800+ hour full Immersion software development bootcamp. The course taught me a modern development stack with a strong emphasis on human skills, teamwork, self awareness and how to learn as you go.
- For my final project I worked closely in a team of 6 to create a music app using the Spotify api. In my role as the Git keeper, I collaborated with the team to resolve merge conflicts, and guide my team through the branch merging process. Check out the final presentation [here](#) - my segment starts at 13.50.

Career Gap

Jan 2023 - Aug 2023

Taking a career break to explore parts of NZ, finding inspiration in nature, and paving the way for a new career.

Countdown Supermarkets

Assistant Produce Manager

Jun 2017 - Jan 2023

- During my tenure, I engaged in diverse roles within various departments, cultivating a broad skill set in teamwork, team management, inventory control, time management, customer service and adaptability.
- My journey began as a produce assistant, where I actively supported multiple departments. Demonstrating versatility and dedication, I transitioned into different roles, ultimately achieving the position of Produce 2IC (Second in Charge). This progression equipped me with a holistic understanding of operations and the ability to thrive in dynamic environments.
